

Cornell Notes Topic: Atmosphere Layers & Gases	Class: 7 th Grade Science Period: 7 th A & B Date: Sunday, September 2, 2019	
Essential Question: Why is Earth's atmosphere important to the survival of life on earth?		
Questions	Notes	
What is the composition of the Atmosphere air?	Key Point #1 Atmosphere	A thick layer of air Surrounds the Earth
Where is the air atmosphere Located?		Without the atmosphere ppl will Die
Why is the atmosphere so Important for ppl?	Key Point #2 Atmosphere Gases	composed of gases for survival
What gas is highly within the Atmosphere? Least?		78% Nitrogen 21% Oxygen 1% Argon and Carbon Dioxide
What are the layers of the Atmosphere?	Key Point #3 Atmosphere Structure	Thermosphere Mesosphere Stratosphere Troposphere
	Remember →	<u>T</u> ropical <u>S</u> kittles are <u>M</u> ighty <u>T</u> asty
Describe what occurs in the Different layers of the Atmosphere?		Thermosphere : Closest to the sun The space shuttle is found here Temperature increases
		Mesosphere: Meteors burns up here Coldest place in the world
		Extends from the strat. to therm Stratosphere: Temperature goes up Ozone layer is found here
		Weather balloons fly here
Summary: The earth's atmosphere is important for survival because it contains important factors such as gas to		
Make sure that people survive on the Troposphere.
